The image shows a development environment with Visual Studio Code on the left and a browser preview on the right. The browser is displaying a web application titled "Jobify Job Tracking App" at localhost:3000. The application features a header with the Jobify logo, a main heading "Job Tracking App", a paragraph of Lorem ipsum text, and a background illustration of a person climbing a mountain. The browser's developer tools are open, showing the HTML structure and the CSS styles applied to the page. The CSS includes a media query for a minimum width of 768px, which sets the grid-template-columns to 1fr 1fr and the column-gap to 3rem. The HTML structure shows a root div containing a main div and a container div. The container div is styled with a grid layout and a min-height of 100vh.
